

MISTRAL COMPACT

*The most compact optical sorter for
plant retrofits and large projects*

The most compact solution on the market, this machine is designed for retrofitting into plants with limited space and access, while guaranteeing the same high levels of performance delivered by the Mistral+ range.

With 2 different configurations, the Mistral Compact particularly meets integrators requirements. It is easily incorporated in place of any outdated existing equipment, whatever the width.

COMPACT

- The most compact on the market
- Adaptable in restricted environments
- Compatible with any existing configuration

SIMPLICITY

- 2 implementation options
- Easy-to-install
- Modular assembly available on site

PERFORMANCE

- Guaranteed same high performance as the Mistral+
- A multi-material range
- Versatile
