

# SMART REPORTING

*Your data, your performance*

SERVICE

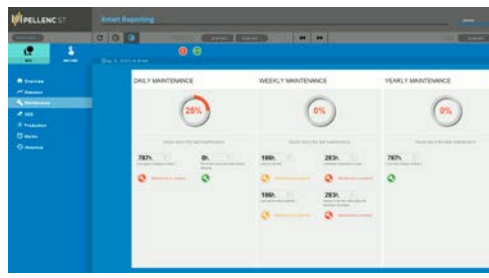

## SMART INDUSTRIES

Pellenc ST continues its modernization and digital transformation to support your productivity increase and operational performance costs reduction in your MRF or recycling plant.

Smart Reporting is a management and operating solution, connected to the Pellenc ST optical sorting machines and its peripherals, accessible remotely and in real time. It is customizable, scalable and secure.

## BENEFITS

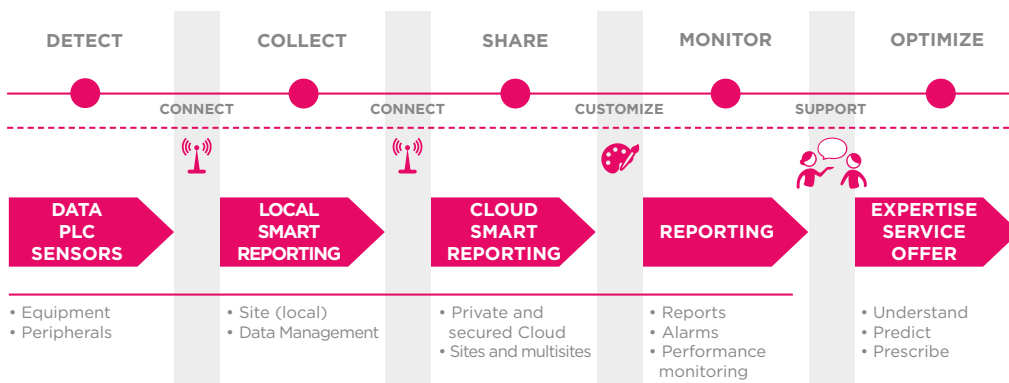

-  Increase equipment availability
-  Warn users with predictive maintenance
-  Increase efficiency and operational performance
-  Connect users and experts
-  Ultra fast implementation
-  Scalable and customizable

## VALUE CHAIN

This secured and customizable solution is based on multiple sources of acquisition and a network of intelligent sensors.

It offers our users, sites or multi-sites, to track, monitor and analyze in real time, or by logging, the performance of their waste sorting operation. This unique solution on the market will help to understand, predict and prescribe management optimizations of the sorting lines.

**SMART REPORTING**  
Anytime, Anywhere, Any Device
