

MY PARTS & KITS UPGRADES

*Get the benefit of the latest advances
from Pellenc ST*

2G

Contains many improvements aimed at increasing the availability of your Mistral machine:

- Replacement of the PC with an industrial model
- Replacement of the original spectrometer with an integrated spectrometer (SPIN), near infrared and/or colour depending on the configuration
- Removal of the bplexer
- Modbus TCP-IP serial interface
- Vortex cooling system upgrade available with 2G technology

Advantages:

- More intuitive user interface
- Multi-channel management
- Availability of statistical data
- Improved detection
- Automatic calibration of the spectrometer settings
- Sorting settings available

VORTEX

Installed in place of the old air conditioner and directly connected to the machine's air circuit.

Advantages:

- No more need for daily maintenance
- No more need for the air conditioner manufacturer's visit

Prerequisites:

- "ISO 8573.1" air quality at 8 bar (minimum) and filtration at 5 µm

PNEUMATIC DISTRIBUTOR FOR MISTRAL G05 and 07/08

No more need for the air tank

Advantages:

- Savings on maintenance costs by eliminating the annual check
- Savings on maintenance costs by eliminating the ten-year approval

INDUSTRIAL PC

Advantages:

- Industrial PC, more durable and higher performance
- FANLESS: without the fan, no maintenance is required
