

# MISTRAL+

The most versatile intelligent and connected sorting machine for waste recovery

## Full Package : a complete system

- + The unique **TÜV certified** sorting solution
- + Designed for **simplified integration**
- + **Easy and secure machine access** for operators

## Unmatched sorting performance

Increased yields and purity

- + **Universal spectrometer** to address all sorting applications
- + Focused lighting offering **the best light signal on the market**
- + Latest generation sorting engine integrating **Advanced Classification**

High speed sorting

- + **Top Speed: + 50% capacity**
- + **Turbosorter (3<sup>rd</sup> generation): stabilization of 2D objects**

## Low maintenance costs

- + Retractable platforms for **easier maintenance**
- + **Low replacement rate for wear parts** (electro valves, lamps)
- + **Economical vortex cooling system** (no air-conditioning)

## Scalable machine

- Platform for the integration of future (CNS) sensors
- Scalability of the Mistral + warranty (upgrades)

## 24/7 Customer Service

- UA turnkey offer, including wear parts
- Local & personalized support
- Connected machines: **Smart&Share**®

## Extensive sorting applications

Combinations of NIR, VIS, Metal & Profile Detection sensors for sorting performance:

- PET: trays / bottles, opaque
- Papers / cardboards
- Black plastic / papers, inerts
