

## PRESENTATION

“The purpose of this upgrade is to increase the availability of Mistral G05 to G09.

It is available for material and/or colour sorting. It contains :

- The replacement of the PC by an industrial model
- The replacement of the original spectrometer by an integrated spectrometer (SPIN),
- Removing the Biplexer

### Benefits

- Reworked, more intuitive interface
- Provision of statistical data
- Automatic calibration of spectrometer settings
- Multi-channel management
- Better detection
- Adjustment possibility, sorting machine

**PRODUCTIVITY & MACHINE AVAILABILITY: +30%**

### Prerequisite

- Concerns Mistral G05 to G09
- After pellencST study

### Installation time on site

- Installation possible: 6 weeks after receipt of order
- Intervention time: 6 hours
