

BEFORE

Cable lifting system

AFTER

Screw tensioner system

PRESENTATION

“ This kit replaces the cable lifting system with a screw tensioner system. It is more robust and reduces maintenance time.

Benefits

It increases reliability and reduces outputbox maintenance time. Eliminates the accumulation of material behind the platform.

- **It makes it possible to minimize from daily to weekly cleaning.**
- **Gain: 30 minutes per week.**

Prerequisite

Adaptable on NETCO G15 output bow, equipped with platform cable lifting system.

Installation time on site

4 hours per machine - Dependent on site integration
Study required
