

PRÉSENTATION

“ Pellenc ST “2021 Modernize” operation offers a series of actions aimed to modernise the Pellenc ST installed base and promoting the adoption of more recent generations of machines by clients. One of these actions involves Pellenc ST repurchasing equipment of previous generations (1G, 2G) as part of the sale of latest generation equipment, Mistral+ or Mistral Compact.

Benefits

- **Replacement of an existing machine by state-of-the-art machine**
- **Performance, ease of use and safety improvements**
- **Operation valid for the entire Full Package**
- **Very attractive trade-in price conditions**

Prerequisite

Any 1G and 2G generation equipment manufactured by Pellenc ST that is functional and in good condition. Pellenc ST reserves the right to refuse to repurchase the old equipment after inspection. The new machine should be a Mistral+, full-package (including conveyor and output box), or a Stand Alone/Mistral Compact (without conveyor and output box).

The machines are repurchased at a price depending on their generation and size, as shown in the table below. The conveyors can only be repurchased if the concerned machine is repurchased. The output box cannot be repurchased and is not part of this operation.

Installation time on site

- Dismantling and loading at the customer’s expense
- Transport at the expense of Pellenc ST
- Installation time of the new machine according to the machine range, size and on-site study
